DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yu (US 6,224,173).

Yu discloses a tray 2 comprising a non-tapered square cavity that is substantially symmetrically open-ended at each end. The cavities are a uniform size and shape and further comprise a plurality of evenly spaced, uniform ribs 25 protruding into the cavity, and positioned around said cavity at intervals. The ribs 25 are longitudinally positioned parallel to the length of the wall of the cavity, and extend along the entire length of the walls. Finally, Yu's tray is made of plastic (col.2, l.49) considered to be a rigid material. The tray 2 and rib 25 are made of a unitary, continuous piece of material, as Yu teaches this is desirable for lessening manufacturing costs (col.1, ll.33-36).

Response to Arguments

3. Applicant's arguments filed 12/13/06 have been fully considered but they are not persuasive. First applicant argues that the finality of the previous Office Action was improper. The examiner disagrees and maintains that the addition of the limitation "substantially symmetrically" to modify the existing phrase "open-ended" distinguished over the Brocken reference, thus necessitating an additional search, which returned the Yu reference. Therefore, in accordance with MPEP 706.07(a) the finality of the previous Office Action was proper.

Regarding applicant's arguments on the Yu reference, the rejection above has been modified accordingly to read on applicant's claim. More specifically, the "tray" is now defined as element 2, which is of a one-piece construction with ribs 25. Accordingly, applicant's arguments are considered moot.
